Summary

Results-driven MERN Stack & AWS Serverless Developer with 1+ years of experience building scalable, production-grade web applications. Skilled in React.js, Node.js, MongoDB, and AWS cloud services (Lambda, Cognito, API Gateway, S3). Experienced in designing secure authentication systems, serverless microservices, and RESTful APIs with clean architecture and optimized performance. Adept at transforming complex requirements into robust, maintainable solutions that deliver measurable business value.

Core Competencies: Full Stack Development | Serverless Architecture | Cloud & DevOps (AWS) | Database Design & Optimization | Authentication & Security | RESTful APIs | Agile Methodologies | Performance Optimization

Education

Zagazig, Sharkia, Egypt

Zagazig University

09/2018 - 06/2022

Bachelor of Computer Engineering Faculty of Engineering

Experience

Full Stack Developer (Freelance) | Vouchcom Limited Remote (London), UK

05/2025 – 10/2025

- Delivered a CV generation platform end-to-end: AI-assisted content (skills, summaries, rewrites), editable sections, and one-click PDF export . Reduced PDF generation time by 40% through optimization.
- Built scalable serverless APIs on AWS with robust routing, schema-driven validation, authentication/authorization, and consistent error handling . Processing 10,000+ requests daily.
- Implemented a headless-Chrome PDF pipeline with secure S3 storage and pre-signed download links; added cron-based draft cleanup and idempotent updates.
- Engineered data models and queries in MongoDB for users, templates, sections, and documents; optimized connections to minimize cold-start latency.
- Added production observability and security: structured logs, metrics/alerts, least-privilege IAM, and repeatable IaC provisioning.
- Contributed to the frontend: CV editor UX, form validation, authenticated flows, preview/download, profile image upload, and API integration.
- Implemented authentication system supporting 500+ concurrent users with JWT and AWS Cognito

Projects

• Portfolio

[Github](#) | [demo](#)

01/2023 - 06/2023

- Developed personal portfolio website using React.js and Tailwind CSS to showcase technical skills and projects.
- generated responsive design with clean UI/UX for professional presentation to potential employers.

• E-Commerce Platform

[Github](#) | [demo](#)

03/2023 - 08/2023

- Built full-stack e-commerce application with React.js frontend and Node.js backend using JWT authentication.
- enforced role-based authorization system with admin dashboard for product and order management.

• Disney Clone

[Github](#) | [demo](#)

07/2021 - 09/2021

- Built Disney+ streaming platform clone using React.js with fully responsive design and Google OAuth authentication.
- executed dynamic content rendering and modern UI components for seamless user experience.

• Amazon Clone

06/2022 - 07/2022

[Github](#) | [demo](#)

- initiated Amazon e-commerce clone using React.js and Redux for state management with Firebase integration.
- Developed shopping cart functionality, user authentication, and real-time database synchronization.

Skills

- Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Next.js, Redux, TypeScript, Jest, Responsive Design
- Backend: Node.js, Express.js, MongoDB, Firebase, RESTful APIs, MySQL, PostgreSQL, JWT Authentication, Server-side Rendering
- Cloud & DevOps: AWS Lambda, API Gateway, Cognito (Auth & OpenID Connect), S3, SES, Secrets Manager, MongoDB Atlas (serverless), EventBridge, SQS, SNS, Serverless Architecture
- Version Control & Methodologies: Git, GitHub, Agile
- Tools & Platforms: Vercel, Netlify, Postman, npm, jsreport-core, Unit Testing
- Soft Skills: Problem-solving, Leadership, Team Collaboration, Time Management, Project Management, Critical Thinking
